

PL-X: GO WHERE OTHERS CAN'T

With up to 18 unique configurations, the PowerLift makes reaching difficult places easy and safe for schools, churches, auditoriums, theaters, offices, and more.

SMART MODULAR DESIGN

- PowerTrak™ powered by cordless drill
- Patented mast coupling system for quick extension
- Multiple base sizes and platform height options

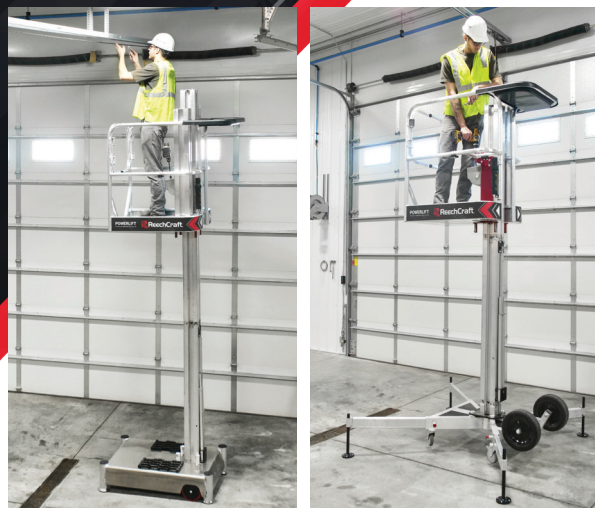

EXTREMELY PORTABLE

- One person can carry up stairs when disassembled
- Rolls over rough terrain with ease
- Fits and moves easily in tight spaces

PRACTICAL

- Complies with ANSI and OSHA standards
- Easily accessible tool tray
- Maximum platform height 24 ft
- 350 lb platform capacity
- Stable at all heights

Note: For indoor use only.

>> DID YOU KNOW?
ReechCraft's PowerLift offers choices of fixed base, compact base (shown here), outrigger base, and straddle base! Flip over for more details!

» BASE OPTIONS

INSTANT ACCESS ▾

The compact base is easy to maneuver and automatically stabilizes when the platform is raised.

SMALL FOOTPRINT ▾

The stable fixed base has an incredibly small footprint. This makes it perfect for working in tight areas where typical lifts cannot be set up.

EASY SETUP ▾

The classic outrigger base with adjustable pads quickly creates a stable foundation, even on the most difficult surfaces.

HIGHLY VERSATILE ▾

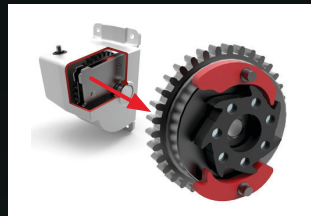

The straddle base is a versatile option for a wide variety of jobs. With this setup, working over obstacles like theater seats or church pews is no problem.

ACCESSORIES + FEATURES

HITCH HAULER ▾

The convenient Hitch Hauler eliminates the need for a trailer—any vehicle with a two-inch receiver hitch can transport the PowerLift with outrigger base. The PowerLift can be loaded and secured in a matter of seconds, and no ropes, chains, or straps are required. With the Hitch Hauler, you can keep your storage space available in the vehicle.

OVERSPEED BRAKE ▾

The gearbox features an integrated overspeed brake to automatically stop the platform in the event of overspeed.

LIGHTWEIGHT ▾

The lightest mid-range lift on the market! Components can easily be disassembled to make the PowerLift even more portable.
